GO FOR GOOD

Fashion & home items, more responsibly

| RESPONSIBLE COTTON

We are aiming for 100% responsible cotton on All La Redoute Collection and La Redoute Interieurs products by the end of 2022. This means our entire collection will be made of organic or recycled cotton, which consumes less water and without pesticides, or will have the BCI label, which is an organisation that promotes better standards in cotton growing and an improvement in its practices. Already 100% of our AMPM bedlinen collection is organic, and all of our new kids bedlinen is organic cotton.

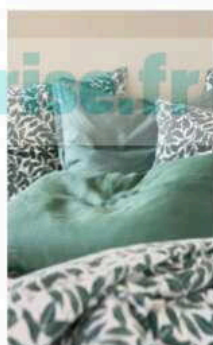

| LINEN

Flax is a natural material grown without irrigation and requires very little water, with few phytosanitary products and little waste is created to produce linen. As one of the most biodegradable fabrics, you can buy discover our range of linen bedding, linen sheets, linen curtains and cushion covers plus more.

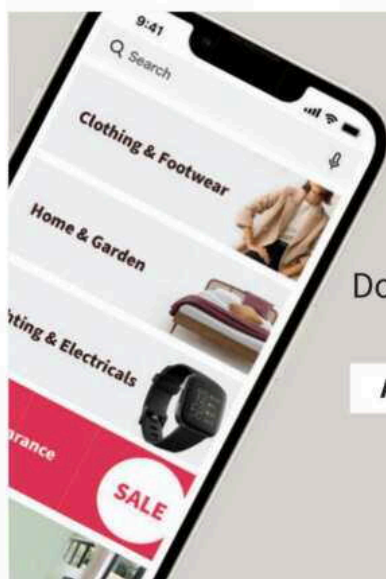

| EVEN MORE NATURAL MATERIALS

Our vision is to be ever more responsible, so we try to use and develop products with textiles which are natural and eco-friendly where possible. Hemp makes beautiful bedding, and requires little water and land to grow. Eco friendly jute requires minimal water and chemicals to grow, and can be round across our rugs ranges". Wool rugs are not only biodegradable but also hypo-allergenic and naturally repel dirt.

| RECYCLED MATERIALS

Discover our ranges of products made from recycled materials, including rugs made from 100% recycled plastic bottles, parquet-style furniture made from recycled wood, recycled pine and elm furniture, and bespoke tables and stool giving a second life to vintage shutters and doors collected in Chinese villages.
